

# A Tiger should be able to be a tiger.

Not a performing animal — forced to perform unnatural acts in circuses and shows.

*Spanky, a 6 year old female, is one of our rescued tigers.*

**Tigers don't make good house pets. They are dangerous, unpredictable animals.**

PAWS provides sanctuary for rescued, captive wild animals. Please help us keep wildlife "WILD" — don't support circuses and other forms of entertainment that exploit these beautiful animals.

[www.pawsweb.org](http://www.pawsweb.org)

**Captive tigers are forced to live in cramped, confined spaces.**

They suffer from many genetic abnormalities:

- Eye and dental diseases
- Metabolic bone disease
- Neurological and heart diseases
- Cancer
- Fatal viral diseases
- Often crippled by botched declaw surgery
